## Project is trailblazer

THE county Furniture Recycling Project is leading by example after a visit from schemes across the country.

Members of furniture projects from as far afield as Edinburgh attended a presentation on a new system, which is web-based and currently not available elsewhere in the UK.

FRP chief executive Ian Ellis said: "We have developed this system in partnership with Urban Element, a specialist IT Company based in Witney.

"The system has provided us with significant opportunities to improve our customer service since it was put into operation earlier in the year.

"It also provides us with a wide range of reports to enable us to manage the charity more effectively.

"We are now in a position to work with other similar organisations throughout the UK who could benefit from using this unique system."
